“No more worrying about glasses or lenses for diving... incredibly practical”

Beat Ruch, Interior Decorator

My main reason for having this treatment was my hobby, which is diving. Being able to dive without glasses or contact lenses is incredibly practical.

Another reason to opt for laser eye treatment was that my health insurance paid a share of the cost.

I am delighted with the end result. Living without glasses or lenses has really changed my attitude towards life!

For me personally, the biggest thing after the treatment was not having the hassle of contact lenses. Now I don't have to worry about all the bits and pieces you have to carry around with lenses. It has given me some freedom back.

I would have the treatment done again if the result were the same, even though I know that surgical treatment does carry certain risks.
