## “Exercising without visual aids, no more expenses for glasses and lenses...”

### Jenny Carizzoni, Pharmacist

My glasses always bothered me when working out, and contact lenses weren't really an ideal solution for swimming. I am delighted with the result and haven't had any problems.

Being able to see clearly as soon I get up is great, and it's brilliant being able to exercise without glasses or contact lenses. I received excellent, professional support and advice.

What's more, my health insurance also paid a large share of the costs and works closely together with LASER VISTA as an expert partner.

I would definitely have the treatment again!
